About the Sea Goat:

Hello Capricorn Season! Capricorn is the sign that rules your **goals and ambitions**, and this comes as we exit Sagittarius Season, which is very loose and noncommittal. With Capricorn, it's time to buckle down, get things done, and make things happen. No more time for just dreaming, it's time to act!

Capricorn rules **discipline**, and this helps us to be highly focused and work harder for what we want. Capricorn doesn't want to settle, and doesn't even think of it! So Capricorn remains disciplined and focused, and gets it done.

Capricorn rules **new heights**, so this is a time to focus on hitting new heights and hitting your stride. There is so much to accomplish, and the more we succeed, the more ambitious we can feel.

Capricorn rules **tradition**, so we may focus on doing things the way they've always been done, and sticking to what we know well. No need to rock the boat for now (that's what the next season is for!).

Capricorn is highly **responsible**, and we can take our responsibilities seriously. We can work on being as responsible as possible, and shirking responsibilities is a big no-no. That just irritates Capricorn, and then comes the punishment!

Capricorn is the sign of **maturity**, and takes a mature approach to everything it does. This sign seems much older when young, but then can seem a lot younger when old. With age, it learns to not take everything so seriously.

Capricorn is a very **practical earth sign**, and doesn't give in to wandering imagination too much. It's also a **cardinal** sign, hence its ability to take action and make things happen.

Capricorn demands **respect and recognition** for what it does, and often earns it through hard work and determination. Over time, status is achieved, and Capricorn feels secure in its place.

Capricorn is also the sign of the **boss** - this sign doesn't take orders, it gives them! And Capricorn always seems to know what it's doing or what it's talking about, so we go along with it!

So, have a happy birthday season to the Capricorns! And to everyone else - be ambitious, be practical, and be the boss!

I'M THE BOSS

What to do during Void Moon periods:

When the Moon is void-of-course, it has made its last major aspect in the sign the Moon is touring, and is now just moving toward the new sign. This is sort of an aimless period for the Moon, so Void Moons are good for slowing things down, getting rest, tying up loose ends, and finishing things you've already started. This can be a time to slow down and assess where you're going during Capricorn Season. They're not seen as particularly good periods for anything new, unless you want nothing to come of it. The exception is if you have any natal or progressed planets at 29 degrees (the anaretic degree). This means the Moon is moving to aspect your anaretic planet, and therefore is still giving you energy personally. You may feel invigorated while the rest of us are slumping!

Quarter Moon Phases During Capricorn Season 2019-20

Solar Eclipse

December 26th 12:12AM ET/December 25th 9:12PM PT

Keyword: BEGIN

Moon Location: 4 degrees 6 minutes Capricorn

Solar Eclipses correspond to New Moons, and the New Moon phase is a time of new beginnings, new ideas, new plans, and new energy. With a Solar Eclipse, this energy can last, and we're focused on this for some time with whatever we work on. In Capricorn, we can set new goals, work on long-term plans, and make sure we're going in the right direction.

What new ideas, plans, and opportunities can you focus on with the Solar Eclipse in Capricorn?

2nd Quarter Moon Phase

January 2nd 11:46PM ET/8:46PM PT

Keyword: ADJUST

Moon Location: 12 degrees 15 minutes Aries

2nd Quarter Moon phases tend to focus on adjustments that need to be made. We've started new with the New Moon and are charging toward the Full Moon, where we reap what we've sown. This phase is the time for us to be flexible so we can improve our chances of succeeding with the Full Moon. In Aries, we may need to take charge, make use of energy and drive, take initiative, and find enthusiasm.

What adjustments can you make, or how can you be more flexible, during the 2nd Quarter Moon phase?

Lunar Eclipse

January 10th 2:21PM ET/11:21AM PT

Keyword: CULMINATION

Moon Location: 20 degrees 0 minutes Cancer

Lunar Eclipses correspond to Full Moon, and the Full Moon phase brings the climax of the Moon, and therefore brings culminations, endings, and we reap what we've sown. We can experience success and make progress, or we can experience setbacks, delays, and failures. This is even bigger with a Lunar Eclipse. Emotions run high, especially with Cancer, the sign of emotion. We may need to work on being more nurturing of ourselves and with others, getting and giving support, and strengthening foundations.

How can you manage developments with the Full Moon, and have proper outlets for your emotions?

4th Quarter Moon Phase

January 17th 7:59AM ET / 4:59AM PT

Keyword: CLEAR

Moon Location: 26 degrees 51 minutes Libra

4th Quarter Moon phases focus on clearing out and cleaning up to make room for the new energy coming with the New Moon phase. This can be a quieter time when we're focused on preparation. With Libra, we can work on improving the way we work and deal with others, clear out chaos to bring peace, and find a balance to help us make more progress.

What can you clear out and clean up during the 4th Quarter Moon phase?

☾ Lilith During Capricorn Season 2019-20

The dark lady, Black Moon Lilith (a dark pixie!) is in Pisces for the rest of this year, and goes from 25 to 29 degrees during Capricorn Season. Lilith in Pisces tends to be more subdued for Lilith. Lilith wants to break out, shake up the patriarchy, and be true to itself. But Pisces doesn't like doing that too much! So we may try to make changes quietly, in subtle ways that don't grab too much attention. Where we may see more of a fighting spirit come out is when we're helping the helpless, and need to stand up for the defenseless. We may want to punch the heartless in the mouth!

Capricorn Season comes with 3 Lilith aspects: trine (positive aspect) transit Mars (December 29th, this helps give us energy and drive to push to speak up and empower ourselves), sextile (positive aspect) transit Mercury (January 16th, this helps us to speak up and speak truth), and sextile transit Sun (January 19th, right at the end of Capricorn Season, shining a light on what we want to stand up for and speak about).

Lilith also begins a period anaretic, at 29 degrees of Pisces (the last degree of any sign is the anaretic degree, a point of crisis energy in transit and super high energy). This starts January 18th and runs to January 27th (when Lilith enters Aries). There may be extra energy for standing up and speaking out, but in more subtle, quiet ways, in the background or behind the scenes. We may need to listen more to our intuition to guide us, and work to stand up for others.

Your Lilith energy may come out in the areas of life ruled by the natal house transit Lilith is touring for you (find where 25-29 degrees Pisces falls). If Lilith will aspect any of your natal planets or house cusps, this may trigger your inner Lilith, and you may stand up and be bold!

I'LL TAKE THE REINS

What natal house is Lilith touring for you? Will Lilith make any aspects to your natal chart during Capricorn season?

The Capricorn Solar Eclipse (at 4 degrees 6 minutes) can help us get super clear about what we want, what we're striving for, where we're going, and make plans to get there. We can make use of opportunities to get further with our goals and do things right. This is an eclipse to make the most of in order to succeed!

Aspects: 0 degrees 0 minutes - 9 degrees 6 minutes of Capricorn (conjunction), Scorpio or Pisces (sextile), Aries or Libra (square), Taurus or Virgo (trine), Cancer (opposition); and 2 degrees 6 minutes - 6 degrees 6 minutes of Sagittarius or Aquarius (semisextile), Gemini or Leo (quincunx)

Note the house location and aspects of this Solar Eclipse and potential impact:

Mercury enters Capricorn December 28th @ 11:54PM ET/8:54PM PT

Mercury moves into Capricorn during Capricorn Season, joining the Sun, Jupiter, Saturn, and Pluto. Major Capricorn energy! This is a time to work on long-term plans for goals, get and give advice from those we trust, and use a practical eye to get things done.

Mars enters Sagittarius January 3rd @ 4:37AM ET/1:37AM PT

Mars moves into Sagittarius as Jupiter is now out (as of December 2nd), and this gives one last little burst of energy for Sagittarius. We can work on big ideas, believe in our abilities, and try to be optimistic and expansive. Anything we've been working on for the last year, we may give one last push to see through.

Lunar Eclipse in Cancer January 10th @ 2:21PM ET/11:21AM PT

The Cancer Lunar Eclipse (at 20 degrees 0 minutes) amplifies emotions in a big way, and we can use those emotions to motivate us. This can be a positive use for them, otherwise they may make us subjective and cranky. Work on strengthening the foundation of yourself, your life, projects, and relationships, and clear out the sludge at the core.

Aspects: 15 degrees 0 minutes - 25 degrees 0 minutes of Cancer (conjunction), Taurus or Virgo (sextile), Aries or Libra (square), Scorpio or Pisces (trine), Capricorn (opposition); and 18 degrees 0 minutes - 22 degrees 0 minutes of Gemini or Leo (semisextile), Sagittarius or Aquarius (quincunx)

Make note of the house location and aspects made by this Lunar Eclipse and potential impact:

Uranus Retrograde Ends January 10th @ 8:47PM ET/5:47PM PT

Uranus has been retrograde since August 2019, and this comes to a close mid-January (at 2 degrees 38 minutes Taurus). We may have felt stuck in some ways, wanting changes we couldn't make, or experiences developments we weren't happy with. We can start to make changes in more positive ways as Uranus moves on, and take control.

Venus enters Pisces January 13th @ 1:38PM ET/10:38AM PT

Venus moves into Pisces, and we can work to be more compassionate and empathetic with others. Creative energy can surge, and imagination can be whimsical. We can use this in practical ways, and this may be a good time to make a dream reality.

Mercury enters Aquarius January 16th @ 1:30PM ET/10:30AM PT

Mercury enters Aquarius, leaving Capricorn, and we can think more about the future. With all of the focus on goals, direction, and long-term plans, it's only natural to think about the future! What do we hope for and dream about? Think outside of the box.
