## **EXTRAS THIS WEEK:**

### **VENUS ENTERS VIRGO | OCTOBER 2ND**

Venus moving into Virgo helps us focus on the little things in our relationships and dealings with others, but we can also pick them apart. Perfectionism needs to be let go of. We can enjoy getting little things done, and want to be helpful with those we care about.

### **PLUTO DIRECT | OCTOBER 4TH**

#### **22 DEGREES 29 MINUTES CAPRICORN**

Pluto ends its retrograde after almost 6 months. The retrograde of Pluto is usually a time to slow down the massive transforming, and adjust to what has already passed. With the retrograde ending, the time to transform comes back. This may seem extra important with the Capricorn stellium coming to a close in a little over 2 months. Those big transformations of the traditional, the conventional, the status quo, the always-has-been can be targeted while we still feel we have the chance to make something happen. But, with the retrogrades and Mars and soon Mercury, we do have to be deliberate, precise, cautious, thoughtful, and purposeful.
