

# Capricorn Goals

This Capricorn Season is CRAZY Capricorn! With Jupiter now in Capricorn, joining Saturn and Pluto, and the Sun and Mercury touring Capricorn, and a Solar Eclipse in Capricorn - holy Capricorn! SO this is one of the most amazing times, period, for all of us, to focus on our goals, our direction, our path, and get clear about where we're going and how to get there.

This may be focused for you specifically on the areas of life ruled by the house(s) the Capricorn planets will tour (look specifically for where 22 degrees Capricorn falls since the Sun, Mercury, Saturn, and Pluto will conjunct around that degree in January, and any planets that may be impacted in your natal chart).

For this season, get started by working on some small goals that you can achieve quickly. This serves as inspiration to keep you going with the big goals.
